

In-Text Citation Format for Citekeys

Citation key format: [@ + last name of first author + year of publication + first word of title (excluding function words i.e. a, an, the, but, of, etc.)] = i.e. [@zimmerman2020system; @zimmerman2000models]

Setup BetterBibTeX with Zotero

1. Download BetterBibTeX for Zotero here:

- <<https://retorque.re/zotero-better-bibtex/installation/>>

Add Better BibTeX as an Extension in Zotero:

- In Zotero, click on Tools > Add-ons
- Click on the gear icon, "Install Add-on From File", select .xpi file, then "Restart now."

Better BibTeX Set Up

- Once Zotero restarts, a pop-up will appear to configure BetterBibTeX.
- Click "Next" through the Set Up (Select "I have used BBT before" when prompted) until you're finished.

Set Up Citation Parameters

- Click on Tools > Add-ons > Options
- For Citation key format, enter: [auth:lower][year][veryshorttitle1:lower]
- Under "QuickCopy format", use "Pandoc" and check the box for "Surround Pandoc citations with brackets"

Refresh citekeys to match new format

- Select all citations (Ctrl + A), right click & select "Better BibTeX", then select "Refresh Better BibTeX key"

Chat

1. Click on Chat Icon in upper right corner

2. Add page URL &

Add URL of the page you are on. Alert specific collaborators by typing "@" followed by the name.

Knit Manuscript in R Markdown

Download the .bib and .csl file

- In Zotero, Under "Group Libraries", right click on TeamPSD > Export Library > Better BibTeX > Keep Updated > Ok
- Search for the citation style and download the related .csl file here: www.zotero.org/styles

Create an R Markdown file

- Copy + paste manuscript including citation keys to a new R Markdown file.
- Add "# References" to end of the R Markdown file to auto-generate a references list at the end
- Put the .bib & .csl file in the same working directory (folder) as the R Markdown file
- Add the YAML header below:
title: Insert Manuscript title here
output: html_document
bibliography: Add .bib file name here (i.e. teampsd.bib)
csl: Add .csl file name here (i.e. apa.csl)
- Select "Knit" at the top
