Welcome to *Modeling to Learn!* This is a tool for clinic teams to explore, learn, and make decisions together for optimizing services to Veterans with their existing or projected resources.

Remember, the key is Modeling to Learn – team learning to improve team decision-making. As you and your team play and discuss experiments, you'll gain deeper clarity about how your clinic works, what's within your control to change, and how to make decisions that balance a lot of objectives at once.

Session Start

Select Learning Mode

	Care Coordination	Medication Management
Existing Patient Return-to-Clinic Visit Interval	◎	◎
New Patient Start Rate	◎	◎
